WHAT IS LOCAL SOURCE CONTROL?

WHAT IS LOCAL SOURCE CONTROL?

The Local Source Control (LSC) Partnership is comprised of local governments, including cities, counties, and health districts.

Small businesses typically have limited access to expertise on stormwater management and hazardous waste handling and disposal. LSC specialists in participating jurisdictions offer free, on-site technical assistance to help small businesses identify and resolve possible causes of pollution.

This hands-on assistance and regulatory advice reduces health risks for employees and prevents polluted runoff from harming Washington's streams, rivers, and Puget Sound.

As a result of LSC assistance, businesses:

- Adopt safer materials handling and storage practices.
- Manage interior and exterior drainage systems to reduce impacts to stormwater.
- Create a plan for spill prevention and preparedness.
- Use fewer toxics in their processes or replace toxic chemicals with safer alternatives.

SINCE THE PROGRAM BEGAN IN 2008:

PROBLEMS? [Data taken from 2013-15 Biennium Report.]

WHERE DO SPECIALISTS FIND THE MOST

Schools / education

Property management companies

Auto repair shops

Restaurants

511

Gas stations

373

WHAT PROBLEMS DO SPECIALISTS FIND DURING VISITS?

[Data taken from 2013-15 Biennium Report.]

No or inadequate spill response procedures No or inadequate spill response materials Products and wastes not properly stored Other hazardous waste issues Employees need proper training

"LSC stands for 'Local Source Control.' However, the 'C' could also stand for 'Collaboration.'

. . . Our approach has always been to identify common goals and work together to meet them."

-Rick Gilbert **Kitsap County Public Works**

PARTNER JURISDICTIONS

Local Source Control partners are located in three critical areas—the Columbia River, Puget Sound, and the Spokane River.

Clallam

City of Port Angeles

Clark

Clark County Environmental Services Clark County Public Health

Jefferson

Jefferson County Public Health

King
