

Fire Department/District Responses

Fire District	Carry Narcan/ Naloxone?	How is it funded?	How many doses do you use?	Details	Contact
Fire District 1: South County Fire	Yes	Got a large amount of Narcan from a KALEO grant. Besides that it is purchased like any other medication through tax dollars and costs are partially recovered through transport fees	Approximately once every three days. Ran report and over last year gave 239 doses (caveat: some patients require multiple uses which isn't accounted for here)	Might be interested in partnering for trainings if needed. Mentioned reaching out to Blue Cross Blue Shield or Molina Healthcare about a partnership for Naloxone	Thad Hovis- Acting Assistant Chief of Operations/ Doug Dahl- Interim Fire Chief
Fire District 4: Snohomish	Yes	Real estate taxes and transport fees is where money comes from up front to buy Narcan. Recouped through billing and insurance, but don't see that money come back that often. Bought like any other medication they use, with tax dollars built into budget	Couple of times a week. EMS once or twice a week. Fire once or twice a month. Rough estimate using those numbers: 128 doses used in a year	Their pricing: pay \$36.7 mg per dose for nasal, and pay \$186 for vial, which is typically used through IV once EMS arrives and starts a line.	Ron Simmons (Chief)
Fire District 5: Sultan	Yes	Paid for through tax dollars and is just a part of medication budget (try to recoup cost in transport fees but not many people want to take the transport that far)	Not often. Maybe once a month (smaller fire district)		
Fire District 7: Snohomish County	Yes	"Narcan is funded through our budget. We do not recoup cost on Narcan."	"In 2018 we gave 82 doses of Narcan"		Gary Meek (Chief)
Fire District 8: Lake Stevens	Yes	Naloxone is funded through the budget	50 doses given in past year	They see about 4,000 patients and transport 2,700 where some of the cost for Naloxone is recouped indirectly	Kevin O' Brien (Chief)
Fire District 10: Bothell	Yes	<i>Waiting on response</i>			Bruce Kroon (Chief)
Fire District 12: Marysville	Yes	Comes out of medical supplies budget (tax dollars)/ Charge Fee for service but it is a flat fee for transport, no direct line item where cost of Narcan is recouped.	98 deployments in the last year		Martin McFalls (Chief)
Fire District 15: Tulalip Bay Fire	Yes	Comes out of a general budget	<i>Waiting on response</i>		Ryan Shaughnessy (Chief)
Fire District 16: Lake Roesiger	Yes	<i>Waiting on response</i>		Small, all-volunteer fire department	
Fire District 17: Granite Falls	Yes	<i>Waiting on response</i>			Jim Haverfield (Chief)
Fire District 19: Silvana	Yes	Pay for it themselves, but very rarely have to use it. Is not usually recouped though transport fees.	One dose in last six months		
Fire District 21: Arlington Rural	Yes	<i>Waiting on response</i>			Chad Schmidt (Chief)
Fire District 22: Getchell Fire	Yes	"At least for our agency it is funded through our budget for EMS"	"For our agency it often expires before we use it... I have not run the numbers"		Travis Hots (Chief)
Fire District 24: Darrington	Yes	Budget	2 doses used in past year		
Fire District 25: Oso	Yes	<i>Waiting on response</i>			
Fire District 26: Skykomish Valley	Yes	Paid through their regular budget and from transport fees	4 doses used in past year		Eric Andrews (Chief)
Fire District 27: Everett	Yes	<i>Waiting on response</i>	170 doses in the past year		
North County Regional Fire	Yes	Comes out of regular medication budget/ some recouped through transport fees but not all patients get transported	11 doses in last year		
		Total Doses in Last Year (For Data Collected):	784
